March 20 2020

Dear Bellevue Family,

We wanted to touch base with all of our members in regards to the coronavirus. As of today, the golf course is open for the 2020 golf season (weather depending) The lounge and snack bar areas are not open and will remain closed until health officials advise otherwise. The kitchen is still open, in limited capacity, as we are able to still provide snack items and certain menu items for the turn or take-out.

In order to ensure the safety of our employees and our customers, Bellevue has implemented a hands free environment in the club house. Some of the measures that have been implemented are:

- All necessary entrances are being kept open throughout the day including the Pro Shop door
- We have increased our cleaning and sanitizing routines in high traffic areas.
- We are for the time being, **no longer accepting cash** as payment, only debit or credit
- We are encouraging all players to use their "tap" for all transactions
- **We are asking all players not to handle merchandise**, but to ask for assistance if interested in purchasing an item.
- Scorecards and pencils will be handed out to each group
- No receipts are required after the transaction is completed
- All cart keys will remain in the carts and left in the "on" position
- Alcohol wipes are available for all players who rent golf carts or pull carts
- All league boxes have been removed and we are suggesting that once league play gets underway, that players take a picture of their scorecard and email it to the scorekeeper.

- **For those purchasing memberships or league memberships, we are encouraging individuals to call and make payment by credit card over the phone.** This will ensure that we can keep things hands free when you come to play.

On the golf course, all sand trap rakes, ball washers and porta-johns have been removed. We are also encouraging players to incorporate their own safety measures such as bringing hand sanitizer with them to use throughout their round.

By implementing the above safety measures and continuing to make changes according to the latest recommendations of public health officials, this is how we, together with our customers can ensure that golf remains one of the safest things to do.

Sincerely,

Mark Malott  
President of Belleview Golf Club

**P.S. We would like to let everyone know that we have purchased a new fleet of 2020 Club Car Tempo's. These new golf carts will also have Visage LT and GPS in them. The GPS will not provide hole layout, but will provide exact yardage to the pin as well as front and back of the green yardages.**
